

BIG BEAR LAKE, CA SNOWBOARDING

Fun fact about snowboarding:

In 1929, M.J. "Jack" Burchett cut out a piece of plywood, attached it to his feet, and went down a hill. The second known snowboard was invented in 1965 by Sherman Poppen. He invented it by fixing two skis together for his daughter. His wife named it "The Snurfer." Jake Burton took interest in the snurfer and perfected it to the snowboard we know today.
